

Agah Duzenli

Houston, TX • +1 (854) 218-1419 • agahduzenli@gmail.com • github.com/agahduzenli • linkedin.com/in/agahduzenli

Summary

Full-stack developer and CS student with a background in architecture, specializing in backend engineering, database systems, and business automation. Experienced delivering production software for real clients and self-hosted infrastructure using Next.js, React, FastAPI, PostgreSQL, Python, and Go. Proven ability to identify operational inefficiencies and replace them with automated, data-driven solutions.

Education

University of Houston

B.S. Computer Science • Minor: Management Information Systems (MIS)

Aug 2025 – Present

Houston, TX

Houston Community College

A.S. Computer Science

Jan 2023 – May 2025

Houston, TX

Eskisehir Technical University

B.Arch Architecture • Erasmus+ Exchange, University of Sopron, Hungary (2022)

Sep 2019 – Jun 2022

Turkey

Experience

Freelance Web & App Developer

2024 – Present

Independent Contractor — Multiple Clients, Houston, TX

- Delivered custom web and internal app solutions for 3–5 local Houston businesses using Next.js and React, including landing pages, e-commerce sites, and operations tooling.
- Built an automated mailbox renewal and customer notification system for Memorial Postal using Python and REST APIs, tracking 100+ customers and eliminating manual email outreach (Dec 2025 – Feb 2026).

Mama Fontana

Jan 2026 – Present

Web & App Developer / Business Systems Intern, Houston, TX

- Building a custom Next.js app to automate inventory tracking and staff scheduling, replacing manual spreadsheet workflows.
- Managing e-commerce infrastructure and technical SEO, improving site reliability and digital merchandise operations.

CougarCS — University of Houston | teachHOUSTON

Jan 2026 – Present

Events Chair | Math Teacher, Houston, TX

- Organize CS workshops and industry events at UH; teach structured math lessons simplifying core concepts for students.

Projects

Green Fuzzy Ball — Full-Stack SaaS Web App (React, FastAPI, PostgreSQL, Docker, Nginx, Linux)

2026

- Designed and shipped a production tennis coaching platform end-to-end, self-hosted on an Arch Linux server with Nginx, Let's Encrypt SSL, and Docker Compose.
- Built a FastAPI/PostgreSQL REST API with JWT auth, Google OAuth, bcrypt hashing, and role-based access across a 15+ table schema; added drill-sharing via share tokens and PWA support.

RiderBase — Ride-Sharing Database System (Next.js, PostgreSQL)

2025

- Full-stack platform with BCNF-normalized schema (10+ tables), ACID-safe transactions, real-time fare calculation, and multi-actor commission splits.

DAKAS — K-12 Staff Performance Platform (Next.js, FastAPI, PostgreSQL, Google Gemini)

2026

- Built a full staff-evaluation platform (observations, reviews, goal tracking, AI-generated summaries) as an internship prototype; 7-table schema on Supabase and a 19-endpoint FastAPI backend.

PowerPulse — AI Energy Coach (FastAPI, Google Gemini, PostgreSQL)

2025

- AI forecasting engine predicting 12-hour energy consumption from weather/IoT data; estimated 15–20% cost reduction via peak tariff identification and behavioral nudges.

Skills

Languages: JavaScript, TypeScript, Python, Go, SQL, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Node.js, FastAPI, Tailwind CSS, Vite

Databases: PostgreSQL, Firebase, Supabase, NoSQL

Tools & Platforms: Docker, Docker Compose, Nginx, Git, GitHub, Linux

Concepts: Full-Stack Development, RESTful API Design, Database Design (BCNF, ACID), Authentication & Authorization (JWT, OAuth 2.0, bcrypt), OOP, Business Process Automation, AI/ML Integration (Google Gemini API), PWA
